

VANSHIL JAIN

Indore, India | +91 7974763238 | vanshiljain08@gmail.com | linkedin.com/in/vanshil-jain-592666251

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of hands-on experience designing and implementing scalable backend systems, AI-driven applications, and enterprise automation solutions. Proven expertise in full-stack development using Node.js, NestJS, React, and GraphQL. Specialized in integrating large language models (LangChain, OpenAI, Claude) for intelligent agent pipelines and enterprise workflow automation. Strong proficiency in cloud infrastructure (AWS, GCP), CI/CD automation, and serverless architectures. Demonstrated success delivering production-ready, high-performance solutions that drive operational efficiency and business impact.

PROFESSIONAL EXPERIENCE

Software Engineer – LINKITES

June 2023 – Present | Indore, India

Project: OneTab

- Designed and published custom NPM package for CI/CD integration, standardizing pipeline configurations across 5+ internal projects and reducing setup time by 60%.
- Architected OneCode module utilizing AI to dynamically generate fully functional websites in minutes, enabling 300% faster prototyping workflows.
- Developed comprehensive backend services using NestJS and Node.js with REST and GraphQL APIs, processing 10,000+ daily requests with 99.5% uptime.
- Built intelligent Python-based AI modules integrating GPT models for code analysis and generation, improving development velocity by 40%.
- Integrated GitHub APIs to fetch and analyze repository data, pipeline statuses, and CI/CD logs, providing AI-driven insights for development teams.
- Deployed and optimized AWS Lambda functions handling 50+ scheduled cron jobs and background tasks with sub-100ms execution times.

Project: OneReap

- Architected and deployed AI agent pipeline using LangChain and Claude AI for enterprise automation, processing 200+ automated workflows monthly.
- Engineered multi-system integrations connecting agents to Zoho, Slack, Jira, and Google Calendar, enabling autonomous ticket creation and meeting scheduling.
- Designed modular agent workflows utilizing chain-of-thought reasoning to handle complex multi-step tasks, reducing manual intervention by 75%.

Project: HR Automation System

- Built end-to-end recruitment automation platform automating job posting, resume screening, interview invitations, and candidate communication.
- Implemented LLM-powered resume screening engine utilizing semantic analysis to score and rank candidates, reducing screening time by 80% while improving candidate quality.
- Developed AI-powered automated phone screening system making 100+ candidate calls weekly with natural language processing and sentiment analysis.
- Engineered intelligent email personalization engine generating context-aware communications with role-specific and candidate-profile-based tone adjustments.
- Created comprehensive HR dashboard with real-time analytics enabling recruitment pipeline visibility and candidate status tracking for HR teams.

Project: AI Tutor Agent

- Developed conversational tutoring agent with persistent learning state, delivering personalized educational experiences to 500+ students.

- Engineered dynamic test paper and quiz generation engine supporting custom queries (e.g., "Generate 10-question Python loops quiz"), enabling adaptive learning.
- Implemented automated study notes and summary generation with multi-format support (PDF, Markdown), supporting 1,000+ monthly study sessions.

TECHNICAL SKILLS

Backend Development: Node.js, NestJS, Express.js, GraphQL, REST APIs, WebSockets, Socket.io, Python

Frontend Development: React.js, Redux Toolkit, JavaScript ES6+, TypeScript, HTML5, CSS3

Databases: MongoDB, PostgreSQL, MySQL, NoSQL design patterns

Cloud & Serverless: AWS Lambda, AWS S3, Google Cloud Functions, API Gateway

AI & Machine Learning: LangChain, OpenAI API, Claude AI, Prompt Engineering, LLM Integration, Semantic Analysis

DevOps & Automation: GitHub Actions, CI/CD Pipelines, NPM Package Publishing, Docker, Linux

API Integrations: Zoho, Slack, Jira, Google Workspace, GitHub APIs, RESTful services

Development Tools: VS Code, Git, GitHub, Postman, AWS Management Console

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Graduation: June 2023

IPS Academy Institute of Engineering and Science | Indore, Madhya Pradesh

CGPA: 8.3/10
